

Overview of Training

This class will provide small water system operators with the tools needed to implement an effective wellhead protection program for their systems. It will provide technical background (geology, hydrology, etc.) and real world examples of what the issues are and what can be done to address those issues.

Who Should Attend?

Water system operators, superintendents, managers, owners, and municipal officials.

Instructor

Marc Cohen, ASRWVA's Source Water Program Manager, began his professional career as a construction field engineer and then moved into construction management. His second career was in Information Technology at the University of Massachusetts where he also earned an MS in Environmental Engineering. Marc was the Source Water Program Manager with ASRWVA from 2004 to 2011 and returned to this position in 2014.

If you would like ASRWVA to hold a training course at your facility please contact Jason Blais at 860-370-5759 or via email at jasonblais@asrwva.org
